Journal of Non-Crystalline Solids 235–237 (1998) ix–xv

JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface vii
Contents ix

Section 1. Dynamic heterogeneity

Nature of the non-exponential primary relaxation in structural glass-formers probed by dynamically selective experiments
R. Böhmer, R.V. Chamberlin, G. Diezemann, B. Geil, A. Heuer, G. Hinze, S.C. Kuebler, R. Richert, B. Schiener, H. Sillescu, H.W. Spiess, U. Tracht and M. Wilhelm 1

Can density or entropy fluctuations explain enhanced translational diffusion in glass-forming liquids?
M.D. Ediger 10

Structural heterogeneity in supercooled liquids and glasses
Y. Hiwatari and T. Muranaka 19

Different dynamic filters constructed from multidimensional NMR experiments
U. Tracht, A. Heuer and H.W. Spiess 27

Kinetic heterogeneities and non-linear rheology of highly supercooled liquids
A. Onuki and R. Yamamoto 34

Molecular dynamics analyzed in terms of continuous measures of dynamic heterogeneity
R. Richert 41

Probe translational and rotational diffusion in polymers near T_g: roles of probe size, shape, and secondary bonding in deviations from Debye–Stokes–Einstein scaling
D.B. Hall, D.D. Deppe, K.E. Hamilton, A. Dhinojwala and J.M. Torkelson 48

Section 2. Theory

An attempt to go beyond the current mode coupling theories of supercooled liquids and glass transitions
K. Kawasaki and K. Fuchizaki 57

Structural relaxation in orthoterphenyl: a schematic mode-coupling-theory model analysis
A.P. Singh, G. Li, W. Götze, M. Fuchs, T. Franosch and H.Z. Cummins 66

Structure and structure relaxation
T. Franosch, W. Götze, M.R. Mayr and A.P. Singh 71

SuperArrhenius character of supercooled glass-forming liquids
D. Kivelson and G. Tarjus 86

Mode-coupling analysis of amorphous PET
H. Eliasson, B.-E. Mellander and L. Sjögren 101

Non-ergodicity parameters for a molecular liquid: a comparison between mode coupling theory and simulation
C. Theis and R. Schilling 106

Shear waves in a supercooled liquid
R. Ahluwalia and S.P. Das 115

Reorientational dynamics in simple supercooled liquids
G. Diezemann, R. Böhmer, G. Hinze and H. Sillescu 121

The β-relaxation amplitudes for a dipolar hard sphere glass
A. Latz 128
A new application of the coupling model: magnetic relaxation in an assembly of small particles in interaction
J. Castro 133
Obstruction model of the fractional Stokes–Einstein relation in glass-forming liquids
J.F. Douglas and D. Leporini 137
Source of non-Arrhenius average relaxation time in glass-forming liquids
J.C. Dyre. 142
Phase diagram for a linear solute molecule in a supercooled liquid
T. Franosch and A.P. Singh 150
The relaxation of a model system of interacting dipoles
V. Halpern 154
Inversion of dielectric spectra into 2D distributions of activation energy and relaxation time
R. Pelster, T. Kruse, H.G. Krauthäuser, V. Grunow, G. Nimtz and P. Pissis. 160
Kinetics of domain growth far from equilibrium in glass materials
G.P. Zheng and J.X. Zhang 164

Section 3. Short time dynamics

Fast-dynamics in plasticized poly(vinyl chloride)
R. Zorn, A. Alegría, A. Arbe, J. Colmenero, D. Richter and B. Frick 169
Dielectric and far-infrared spectroscopy of glycerol
U. Schneider, P. Lunkenheimer, R. Brand and A. Loidl 173
Light scattering study of the liquid–glass transition in trimethylheptane: depolarized near backscattering study
Y.H. Hwang, G.Q. Shen and H.Z. Cummins 180
The glass transition: general scenario and crossover temperature
A.P. Sokolov 190
Anharmonic vibration coupling and fast relaxation in glasses
V.N. Novikov 196
Boson peak, nanostructure and relaxation of glasses
E. Duval, A. Mermet, N.V. Surovtsev and A.J. Dianoux. 203
Dynamic structure factor of glassy *o*-terphenyl: a Brillouin light scattering study
G. Monaco, G. Ruocco, L. Comez and D. Fioretto 208
Heterogeneity of amorphous polymers with various fragility indices as studied in terms of non-Gaussian parameter
T. Kanaya, I. Tsukushi, K. Kaji, B. Gabrys and S.M. Bennington 212
Linear and non-linear electron spin resonance study of the rotational diffusion of a molecular tracer in supercooled o-terphenyl
L. Andreozzi, M. Giordano and D. Leporini 219
Relaxational and vibrational dynamics of poly(propylene glycol)
R. Bergman, C. Svanberg, D. Andersson, A. Brodin and L.M. Torell. 225
Dynamics of water contained in porous alumina
S. Mitra, R. Mukhopadhyay, K.T. Pillai and V.N. Vaidya. 229
Effect of blending on the methyl side group dynamics in poly(vinyl methyl ether)
R. Mukhopadhyay, A. Alegría, J. Colmenero and B. Frick 233
Disorder and picosecond dynamics: the glass↔liquid transformation
D. Quitmann and M. Soltwisch 237
Mode coupling analysis of the dynamical structure factor in supercooled liquid $Na_{0.5}Li_{0.5}PO_3$
B. Rufflé, S. Beaufils, B. Toudic, C. Ecolivet, A. Le Sauze and R. Marchand 244
Spatial scale of low-energy excitation in amorphous polymers
I. Tsukushi, T. Kanaya and K. Kaji 250

Relaxation dynamics in orthoterphenyl: comparing β_K from extended mode coupling theory and phenomenological analyses
H.Z. Cummins, Y.H. Hwang, G. Li, W.M. Du, W. Losert and G.Q. Shen 254
Comments on 'Relaxation dynamics in orthoterphenyl: comparing β_K from extended mode coupling theory and phenomenological analyses'
A. Patkowski, W. Steffen and E.W. Fischer 268
Dynamics of relaxation process of glass transition in deuterated ethylene glycol
G. Matsui, S. Kojima and S. Itoh 271
Light-induced changes of tunneling systems in a-As_2S_3
G. Kasper, R. Gebhardt, J. Honolka and S. Hunklinger 275

Section 4. Long time dynamics

Dielectric susceptibility studies of the high-frequency shape of the primary relaxation in supercooled liquids
R.L. Leheny and S.R. Nagel 278
Isoconfigurational state dependent molecular mobility in the glass temperature range
K. Abbès, G. Vigier, J.Y. Cavaillé, L. David, A. Faivre and J. Perez 286
Free volume aspects of the strong–fragile classification of polymer liquids
J. Bartoš and J. Krištiak 293
Thermoviscoelasticity of glass-forming liquids
T. Christensen and N.B. Olsen 296
Dielectric relaxation of porous glasses
A. Gutina, E. Axelrod, A. Puzenko, E. Rysiakiewicz-Pasek, N. Kozlovich and Y. Feldman 302

Section 5. Computer simulations

Molecular dynamics simulation study of short time dynamics in polystyrene
R.J. Roe 308
A two dimensional glass: microstructure and dynamics of a 2D binary mixture
D.N. Perera and P. Harrowell 314
The dynamics of supercooled silica: acoustic modes and boson peak
J. Horbach, W. Kob and K. Binder 320
Rotational dynamics in a simulated supercooled network-forming liquid
L. Fabbian, F. Sciortino and P. Tartaglia 325
Hopping in a supercooled binary Lennard–Jones liquid
T.B. Schrøder and J.C. Dyre 331
The self-part of the generalized susceptibility of a supercooled binary soft-sphere system
J. Matsui, M. Fujisaki and T. Odagaki 335
A computer simulation of the molecular properties of amorphous poly(vinyl chloride), PVC
I. Neelov, S. Niemelä and F. Sundholm 340
Frequency dependent thermodynamic response functions from computer simulations
J.K. Nielsen 346
Computer simulation of the structure and relaxation of amorphous ice
S. Ozawa, H. Tanaka, Y. Sasajima and Y. Hiki 349
Application of molecular dynamics to the evaluation of dielectric properties of model compounds with flexible side groups of acrylic polymer chains
E. Saiz and E. Riande 353
The Monte Carlo simulation on the relaxational process related to the glass transition of C_{60} crystal
F. Yan, J.-S. Liu and Y.-N. Wang 362

Section 6. Structure and dynamics

An analysis of the short and intermediate range order in several organic glass-forming liquids from the static structure factor under pressure
C. Alba-Simionesco, D. Morineau, B. Frick, N. Higonenq and H. Fujimori 367

Brillouin and neutron inelastic scattering investigation of the relaxational processes in glass- and gel-forming polymers
C. Levelut, Y. Scheyer, J. Pelous and F. Prochazka 375
Density fluctuations in amorphous systems: SAXS and PALS results
L. David, G. Vigier, S. Etienne, A. Faivre, C.L. Soles and A.F. Yee 383
Connection between fictive temperature and structural defects responsible for the relaxational processes in oxide glasses
J.L. Prat, F. Terki and J. Pelous 388

Section 7. β-relaxation

The α and the β relaxation processes in supercooled sorbitol
R. Nozaki, D. Suzuki, S. Ozawa and Y. Shiozaki 393
Scaling of β-relaxation in the equilibrium liquid state of sorbitol
N.B. Olsen 399
Slow secondary relaxation in simple glass formers
A. Kudlik, C. Tschirwitz, T. Blochowicz, S. Benkhof and E. Rössler 406
Dielectric study on β-relaxation process of tetramethyl-bisphenol-A polycarbonate
S. Yagihara, M. Yamada, M. Asano, Y. Kanai, N. Shinyashiki, S. Mashimo and K.L. Ngai 412
The mechanical β relaxation in amorphous cellulose
H. Montès, K. Mazeau and J.Y. Cavaillé 416

Section 8. Thin film, surface, interface and confined dynamics

Shear of liquid films confined to molecular dimensions
J. Klein 422
Dielectric measurements and computer simulation of the effect of confinement on the glass transition temperature
N. Haralampus, P. Argiriadi, A. Gilchriest, E. Ashmore, C. Scordalakes, W. Martin, D. Kranbuehl and P. Verdier 428
Reduction of the glass temperature of thin freely standing polymer films caused by the decrease of the coupling parameter in the coupling model
K.L. Ngai, A.K. Rizos and D.J. Plazek 435
Glass transition in 2- and 3-dimensionally confined liquids
P. Pissis, A. Kyritsis, G. Barut, R. Pelster and G. Nimtz 444
Dielectric normal mode relaxation of poly(propylene glycol) melts in confining geometries
A. Schönhals and R. Stauga 450
Effects of confined geometry and substrate interaction on the initial stages of interdiffusion in polystyrene films
T. Kuhlmann, J. Kraus, P. Müller-Buschbaum, D.W. Schubert and M. Stamm 457
Interaction and dynamics of polymer solutions at the air/liquid interface by laser light scattering
Q.R. Huang and C.H. Wang 464
Kinetic structure of glass transition in polymer interfaces between filler and SBR matrix
S. Vieweg, R. Unger, E. Hempel and E. Donth 470
Similarity of glass transition anomalies in fullerene core polymer stars and block copolymers
V.A. Bershtein, V.M. Egorov, L.M. Egorova, P. Sysel and V.N. Zgonnik 476
Dynamic probe of the interface in lamellar forming non-linear block copolymers of the $(BA)_3B$ and $(BA)_3B(AB)_3$ type. A dielectric spectroscopy study
G. Floudas, I. Alig, A. Avgeropoulos and N. Hadjichristidis 485
Effect of pressure on the microphase separation of the symmetric diblock copolymer poly(styrene–block–butadiene)
H. Ladynski, W. De Odorico and M. Stamm 491

Section 9. Enthalpy and volume relaxations

Linearity limits of dynamic calorimetric response at the glass transition of polystyrene
J.E.K. Schawe and S. Theobald 496

Temperature modulated differential scanning calorimetry during isothermal curing of phase separating polymer networks
I. Alig, W. Jenninger and J.E.K. Schawe 504
Relation between freezing-in due to linear cooling and the dynamic glass transition temperature by temperature-modulated DSC
A. Hensel and C. Schick 510
Enthalpy relaxation of glassy glycerol prepared by rapid liquid quenching
O. Yamamuro, Y. Oishi, M. Nishizawa and T. Matsuo 517
Enthalpy relaxation in Ge_xSe_{1-x} chalcogenide glasses
P. Cortés, S. Montserrat, J. Ledru and J.M. Saiter 522
Structural relaxation of As_2S_3 glass by length dilatometry
J. Málek 527

Section 10. Crystallization

Dielectric relaxation and X-ray scattering of poly(ethylene terephthalate) during crystallization process
K. Fukao and Y. Miyamoto 534
Numerical and morphological approach to the mechanism of homogeneous-nucleation-based crystallization in *o*-terphenyl
T. Hikima, M. Hanaya and M. Oguni 539
Glass transition and crystallization kinetics in $Sb_{0.18}As_{0.34}Se_{0.48}$ glassy alloy by using non-isothermal techniques
J. Vázquez, C. Wagner, P. Villares and R. Jiménez-Garay 548
A luminescence study of microstructure development and melting/crystallization processes in low density polyethylene (LDPE)
M.R. Vigil, J. Bravo, T.D.Z. Atvars and J. Baselga 554

Section 11. Orientational glasses

Metastable state in glassy crystal cyanoadamantane: experiments and simulations
M. Descamps, J.F. Willart, B. Kuchta and F. Affouard 559
Diffuse phase transitions in ferroelectric ceramics
A. Fundora, A. Vázquez, J. Portelles, F. Calderón and J.M. Siqueiros 567
A geometrical model for mixed cyanide crystals
S. Galam 570

Section 12. Polymer dynamics

Dynamics of epoxies: a full dielectric analysis by wideband spectroscopy
S. Capaccioli, S. Corezzi, G. Gallone, P.A. Rolla, L. Comez and D. Fioretto 576
Dielectric relaxation in PMMA revisited
R. Bergman, F. Alvarez, A. Alegría and J. Colmenero 580
Segmental relaxations in complex polymer system as studied by high resolution laser-interferometric creep rate spectroscopy
V.A. Bershtein, P.N. Yakushev, N.N. Peschanskaya, A.B. Sinani and P. Pissis 584
Dynamics and cooperativity in thermoset networks by dielectric relaxation spectroscopy
J. Mijović 587
Relaxation in a neat epoxy resin and in the same resin modified with a carboxyl-terminated copolymer
J.M. Morancho and J.M. Salla 596
Relaxation in semi-interpenetrating polymers network of linear polyurethane and heterocyclic polymer networks
A. Bartolotta, G. Di Marco, G. Carini, G. D'Angelo, G. Tripodo, A. Fainleib and V.P. Privalko. 600
A new separation medium for DNA capillary electrophoresis: self-assembly behavior of Pluronic polyol $E_{99}P_{69}E_{99}$ in 1X TBE buffer
C. Wu, T. Liu and B. Chu 605
A control volume technique for computing continuum deformation measures in discrete polymeric systems
C. Chui and M.C. Boyce 612

Conformational relaxation in conducting polymers: effect of polymer–solvent interactions
H. Grande, T.F. Otero and I. Cantero 619
α and β relaxation processes in internally plasticized poly (vinylchloride)
A. Elícegui, J. José Del Val, J. Luis Millán and C. Mijangos 623
Molecular mobility and structural state relationship in amorphous polymers
S. Etienne, C. Lamorlette and L. David 628
Fragility and non-linearity in polymethyl(α-n-alkyl)acrylates
M.-E. Godard and J.-M. Saiter 635
Effect of homopolymer host chain relaxations on the translational diffusion of a diblock copolymer
P.F. Green and J.C. Barbour. 640
Physical aging and tacticity effects on the α relaxation mode of amorphous polymers by thermally stimulated techniques
S. Doulut, C. Bacharan, P. Demont, A. Bernès and C. Lacabanne 645
Light scattering investigation of self-release polymeric derivatives
A.K. Rizos, A.M. Tsatsakis, M.I. Shtilman and W. Brown 652
α-Relaxation processes in the composites of LC-cellulose derivatives
L. Okrasa, J. Ulański, P. Wojciechowski, G. Boiteux and G. Seytre 658
Ultrasonic study of anharmonicity in amorphous polymers: temperature, pressure and molecular weight effects
A. Sahnoune and L. Piché 664
Mechanical behaviour of biodegradable polyolefins
L. Contat-Rodrigo and A. Ribes-Greus 670
Effects of symmetric and antisymmetric stress tensors on N- and α-dielectric relaxations
L.F. Del Castillo, S.I. Hernández, A. García-Zavala and R. Díaz-Calleja 677

Section 13. Complex fluids

Dynamic light scattering of iota carrageenan gelling system
K.S. Hossain and N. Nemoto 682
Microemulsions as microreactors: a Monte Carlo simulation on the synthesis of particles
C. Tojo, M.C. Blanco and M.A. López-Quintela. 688
Swelling and thermally stimulated depolarization currents in hydrogels formed by interpenetrating polymer networks
G.G. Ferrer, M. Monleón Pradas, J. Luis Gómez Ribelles and P. Pissis 692
Fragility and low temperature excess specific heat in polymer electrolytes
G. D'Angelo, G. Tripodo, G. Carini and A. Bartolotta 697
Interfacial composition as a function of temperature in $C_{12}E_6$ and $C_{12}E_8$ micellar solutions
G. Briganti and A. Bonincontro 704

Section 14. Rheology

Effect of long-chain branching on the rheology of 1,4-polyisoprene
P.G. Santangelo and C.M. Roland 709
Simulation of polymers in dilute solution under elongational flow
J.G. Hernández Cifre and J. García de la Torre 717
An extension of compensation effect for zero shear melt viscosity to non-newtonian flow in glassy polymers
Y. Nanzai 723
Stochastic dynamics of polymer brushes under shear deformation
I. Neelov, F. Sundholm and K. Binder. 731
Yielding in amorphous and semi-crystalline polymers: the compensation law
J. Rault 737

Section 15. Ionic conductivity relaxation

Correlation of self-diffusivity and ionic conductivity in gel electrolytes on basis of oligo(ethylene glycol)$_n$-dimethacrylate
G. Fleischer, H. Scheller, J. Kärger, A. Reiche and B. Sandner 742
Monte Carlo study of diffusion in polymer electrolytes
P. Pendzig, W. Dieterich and A. Nitzan 748
Non-Debye conductivity relaxation in the non-Arrhenius $Li_{0.5}La_{0.5}TiO_3$ fast ionic conductor. A nuclear magnetic resonance and complex impedance study
C. León, J. Santamaría, M.A. París, J. Sanz, J. Ibarra and A. Várez 753
Dielectric and structural investigation of alkali triborate glasses
G.D. Chryssikos, L. Liu, C.P. Varsamis and E.I. Kamitsos 761
Changing Debye–Waller factors in mixed alkali $K_xCs_{(1-x)}Si_2O_5$ glasses
G.N. Greaves, A.V. Chadwick, M.C. Jermy, M.E. Smith and R. Zhu 766
Equivalent circuit analysis of the electrical properties of conducting polymers: electrical relaxation mechanisms in polyaniline under dry and wet conditions
E.S. Matveeva, R. Diaz Calleja and V. Parkhutik 772
Contributions of dynamic heterogeneity to non-exponential electrical relaxation in ionically conducting glasses and melts
C.T. Moynihan 781

Section 16. Metallic glasses

On structural relaxation of $Zr_{52}Ni_{26}Al_{22}$ metallic glass
E. Illeková and J. Bartoš 789
Influence of thermal treatments on the internal stresses of metallic glasses
M. Tejedor, J.A. García, J. Carrizo and L. Elbaile 793
Electrochemical behaviour of $Fe_{40}Ni_{38}Mo_4B_{18}$ amorphous alloys in aqueous solution at high pH. Influence of the structural relaxation
A.R. Pierna, A. Lorenzo, F.F. Marzo, A. Altube and M. Sistiaga 796
